FLOOR CARE

MIRAGE 100

Paver Sealer

Provides a Protective Seal and "Wet-Look" Finish

Achieving that professional wet-look on your pavers, pattern pavement, concrete and terrazzo is easier than you think. By applying MIRAGE 100 to your pavers, concrete and driveway you will give it a long-lasting protection and a deep semi-gloss finish. Areas treated with MIRAGE 100 are easy to clean and maintain. MIRAGE 100 is an acrylic co-polymer which is tough, durable and U.V. protection enhanced.

FEATURES

- Durable polymer seal

BENEFIT

- Fantastic "wet-look" finish
- Stain resistant, easy to clean surface

DIRECTIONS:

Initial Coverage:

Ensure that surface is clean and dry before coating. Using a soft hair broom or a spray apply MIRAGE 100 evenly over the surface. Apply a liberal amount, being careful not to cover areas that should not be covered. A minimum of two coats is recommended three to five coats will provide the best finish. Coverage is 12-15 square metres per litre on the initial coat and 15-18 square meters per litre on subsequent coats.

Re-coating:

After cleaning the surface, Apply another coat of MIRAGE 100 over the top of previous coats. Stripping is not necessary.

Cleaning:

Clean the coated surface with a neutral detergent. Avoid using harsh degreasers as they will aid in surface breakdown and a properly coated surface will not require them.

Pre-Coating Preparation:

Cleaning the surface thoroughly. If harsh degreasers are required rinse well with water before coating. Make sure that the surface is completely dry before coating, once sealed the moisture is locked in.

ACTIVE INGREDIENTS:

- Hydrocarbons, Liquid NOS

QUANTITY AVAILABLE and PRODUCT CODE:

- 5 Litre 4052101
- 20 Litre 4052100

CHEMICAL HAZARD STATUS:

- Solvent – Product will de-fat, and degrease. Irritation may occur.

Mould & Mildew				√
Food & Drinks				√
Oil, Grease, Fat, & Ink				√
Rust, Iron, Scale				√

* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

A TIP FROM THE CHEMIST

Whilst being very easy to apply, Mirage 100 will give even better results if you are sure to follow a few simple steps when sealing. Make sure you clean the surface well, make sure it is really dry before sealing and that you only apply it when surface temperature is over 15 deg. C and under 35 deg.C.
