

PRODUCT DATA SHEET

REPEL

Stain Resistance Protection

Dramatically Improves Carpet & Upholstery Resistance to Staining

REPEL is a carpet and upholstery fabric protection treatment. It is designed to enable fabrics in both carpets and on upholstery to resist the penetration of dirt, grease and grime. The barrier REPEL forms enables easy removal of soiling. When applied to fabric it leaves no visible sign of being there however it will give you long lasting protection. Protecting your carpet and upholstery with REPEL makes stain removal a breeze.

Carpets and upholstery protected with REPEL should be cleaned with mild detergents. When a stain occurs on treated carpet the stain should still be removed as quickly as possible, as you would normally. The stain however in a carpet treated with REPEL will come out with a minimum of effort.

FEATURES:

- Stain resistant barrier solution

Food & Drinks	√			
Oil, Grease, Fat, & Ink	√			
Rust, Iron, Scale				√

* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

A TIP FROM THE CHEMIST

Repel provides a great stain resistant barrier which will make stains much easier to remove. It does not mean however that stains can be left for long periods of time as they will eventually set.
