## SEALER TOP COAT

### Vinyl Floor Seal

#### Seals, Protects and Shines Vinyl and Other Floors

A traditional floor seal SEALER TOP COAT possesses great gloss and durability and is suitable for use with standard buffing systems. SEALER TOP COAT is a fully formulated metal cross-linked copolymer. It is detergent resistant high gloss seal with non-slip characteristics. SEALER TOP COAT produces excellent results with slow to medium speed buffers and will maintain a high gloss with a regular buffing programme.

#### FEATURES:

- Durable metal linked copolymer seal
- High gloss finish

#### BENEFITS:

- Great long lasting protection for vinyl floors
- An easily buffable high gloss finish

#### DIRECTIONS:

##### Application

SEALER TOP COAT is applied to floors where SEALER BASE COAT has already been applied. Apply a minimum of two coats SEALER TOP COAT and more for a better result. Be careful to ensure that floor is clean before applying and avoid air bubbles whilst applying.

##### Maintenance

To ensure a continuous high gloss finish employ a regular buffing programme. Finish may also be enhanced by using low to regular speed buffing machines. Maintenance of the floor can also be carried out with SPRAY BUFF or WASH & SHINE.

#### ACTIVE INGREDIENTS:

- No Scheduled Ingredients

#### QUANTITY AVAILABLE and PRODUCT CODE:

- |            |         |             |          |
|------------|---------|-------------|----------|
| • 5 Litre  | 5851045 | • 25 Litre  | 58510445 |
| • 15 Litre | 5851044 | • 200 Litre | 58510455 |

#### CHEMICAL HAZARD STATUS:

- Neutral – Product is neutral or near neutral and presents a minimal risk.

Mould & Mildew				✓
Food & Drinks				✓
Oil, Grease, Fat, & Ink				✓
Rust, Iron, Scale				✓

\* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

#### A TIP FROM THE CHEMIST

SEALER TOP COAT will deliver the best results when applied to a thoroughly cleaned and chemical residue free surface. When applying each coat ensure it is applied evenly and with minimum streaks and bubbles. SEALER TOP COAT should not be applied in humid conditions, during rain and when the temperature is below 15 deg. C.
