## BANISH

### Hook & Roller Acid Cleaner

#### De-Oxidises and De- Rusts Hooks and Rollers

BANISH is an hook and roller rust remover and is designed for use in hook cleaning baths in abattoirs and other food preparation institutions. Using BANISH on the metallic surfaces of hooks and rollers will de-rust them and restore the metallic finish. This will make them less vulnerable to carrying bacteria. BANISH is also an acid cleaner and rust remover for metallic surfaces and can be used in a number of de-rusting applications. After treatment with BANISH the surface will be given short term rust protection. When using BANISH as a part of the hook cleaning bath system it is added to the second stage of the bath process. The first bath in the process utilises HYLITE hook caustic cleaner for the removal of blood and fat. The hooks and rollers should be protected in the final bath with PROTECT hook oil.

#### FEATURES:

- Acidic formula

#### BENEFITS:

- De-oxidises, removes rust and de-scales

#### DIRECTIONS:

##### Hook Bath:

Dilute 9 Litres of BANISH per 100 Litres. Water can be heated to 55-60degC, although this is not essential. Soak hooks for 2-4 minutes. Rinse with potable water after use. Protect your hooks after rust treatment with PROTECT hook oil.

##### General Rust and Scale Treatment:

Dilute 1 part BANISH to 40 parts water. Apply to the surface to be treated and scrub. Concentration may be increased if the rust or scale build-up warrants it. Before treating metals always check a small area to ensure concentration is not too great for the type of metal to be treated. If the concentration is too high pitting may occur.

#### ACTIVE INGREDIENTS:

- 765g/kg Phosphoric Acid.

#### QUANTITY AVAILABLE and PRODUCT CODE:

- |            |         |             |          |
|------------|---------|-------------|----------|
| • 5 Litre  | 4151015 | • 15 Litre  | 41510145 |
| • 25 Litre | 4151014 | • 200 Litre | 4151016  |

#### CHEMICAL HAZARD STATUS:

- Acid – Product has a pH of less than 5.5, it will cause irritation and burning.

# PRODUCT USAGE ADVICE

## PRODUCT: **BANISH - Hook & Roller Acid Cleaner**

### Product Usage and Application Advice

This section provides a general guide that will be highly useful to helping determine whether this product is suitable for your cleaning requirements. In some cases these tables may not be specific enough, in this case please contact a sales representative from B & J Chemicals or a distributor of the Desert Springs Australian range.

### Cleaning Areas Suitability Table

	IDEAL	GREAT	OKAY	NOT SUITABLE
Bathrooms				√
Hook & Roller Bath	√			
Floors				√
Furniture				√
Laundry				√
Kitchen				√
Vehicles				√
Windows/ Mirrors				√

### Soiling Suitability Table

	IDEAL	GREAT	OKAY	NOT SUITABLE
Blood, urine, vomit				√
Dirt & Grime				√
Disinfection				√
Dye, colours				√
Mould & Mildew				√
Food & Drinks				√
Oil, Grease, Fat, & Ink				√
Rust, Iron, Scale	√			

\* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

#### A TIP FROM THE CHEMIST

For best results, always use Banish as the second bath of the cleaning process. Heating it is not essential but will improve its performance. Do not leave cleaned hooks exposed to air for too long before protecting with oil.
