

PRODUCT DATA SHEET

SINK DETERGENT

The Natural Collection **Detergent & General Cleaner**

Cleans Dishes and General Areas of Grime

The Natural Collection is a series of cleaning chemicals that have been developed with specific cleaning performance and environmental goals in mind. This range of cleaners which covers most cleaning applications, has been built from naturally occurring, regenerative ingredients that have been developed from renewable natural resources. These products are readily biodegradable and utilise naturally occurring acids, essential oils, surfactants and solvents including the popular citrus solvent, d-Limonene. All products in the natural collection have been blended on a base of fresh pure rain water and are fragranced, to produce pleasant fresh notes, with essential oils.

SINK DETERGENT combines a range of naturally occurring ingredients to produce a neutral pH sink detergent that is a phosphate free, biodegradable, premium grade hand dish washing detergent. SINK DETERGENT is a premium grade detergent which is suitable for all kitchen wash-up applications and for use in cleaning many other heavily soiled areas. It utilises a blend of biodegradable surfactants to cut grease and grime, to produce great foam levels and clean dishes, floors, walls and benches with ease. SINK DETERGENT utilises a blended formula of surfactants rather than caustics and is therefore safe for cleaning sealed floors and other areas where a heavy cleaner is needed but the surface under the soiling must be protected.

DIRECTIONS:

Dish Washing: Add 15ml -20ml SINK DETERGENT to 7 litres of hot water.

Floors and General Cleaning: Dilute SINK DETERGENT 12-18ml per 1 litre of warm water. Mop or clean area with solution. Allow to dry or squeegee dry for best results.

ACTIVE INGREDIENTS:

- No Scheduled Ingredients.

QUANTITY AVAILABLE and PRODUCT CODE:

- | | | | |
|------------|----------|-------------|----------|
| • 1 Litre | 58411501 | • 25 Litre | 58411505 |
| • 5 Litre | 5841151 | • 200 Litre | 58411515 |
| • 15 Litre | 5841150 | | |

CHEMICAL HAZARD STATUS:

- Neutral – Product is neutral or near neutral and presents a minimal risk.

Rust, Iron, Scale				√

* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

A TIP FROM THE CHEMIST

Good quality sink detergents like Sink Detergent are built to be neutral pH. This feature makes them ideal for general cleaning where you need a mild cleaning agent for delicate cleaning situations.
