

PRODUCT DATA SHEET

GT-NEUTRALISER

Liquid Laundry Sour

Neutralises Laundry

Another product in the GT-WASH laundry system range. GT-NEUTRALISER is wash neutralizer or sometimes called a laundry sour. GT-NEUTRALISER is used in wash loads that have high alkalinity and require pH reduction. Using GT-NEUTRALISER also reduces ionisation of salts and free ions in the water thus reducing the chances of "water-staining" particularly when hard water and water with high mineral levels are used. GT-NEUTRALISER may be used in place of fabric conditioner when water softening is required but fabric conditioning is not.

FEATURES:

- pH Controlled formulation
- Water stain preventative system

BENEFITS:

- Reduces pH in wash liquor protecting laundry
- No unwanted water and rust stains

DIRECTIONS:

Manual Application:

For every 10kg of washing use 25mls to 30 mls of GT-NEUTRALISER. Add to last rinse of wash cycle if not using a fabric conditioner or second last rinse if conditioner is used. Never add GT-NEUTRALISER before or during wash cycles.

Automatically Dispensed:

See your B & J Chemicals sales representative for details about pump installation.

ACTIVE INGREDIENTS:

- 320g/L Orthophosphoric acid
- 5g/L Quaternary ammonium compounds

QUANTITY AVAILABLE and PRODUCT CODE:

- | | | | |
|-------------|----------|------------|---------|
| • 25 Litre | 58611055 | • 15 Litre | 5861105 |
| • 200 Litre | 58611056 | | |

CHEMICAL HAZARD STATUS:

- Alkaline – Product is above pH 9.5. It may cause irritation or burning.

Rust, Iron, Scale	√			

* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

A TIP FROM THE CHEMIST

The GT-WASH Laundry system is an automatically dispensed group of laundering chemicals designed specifically for use in commercial laundering situations. Best results are achieved when installed and programmed and managed by a trained technician.
