LAUNDRY

NAPPY WASH

BRIGHTENS COLOURED AND WHITES

Safely Bleaches Coloured and Whites

NAPPY WASH is a near neutral pH detergent with the active colour fast oxygen powered safety bleach. It is ideal for laundering nappies and also great for bleaching use to brighten both colours and whites. It works hard to bleach away the stain or stain halo, lifting the dull fabric and making it vibrant again. It is also ideal for use to launder nappies. NAPPY WASH can be used for soaking and washing nappies, or soaking and washing coloureds and whites. NAPPY WASH can be used on its own or added to the main wash cycle, in your washing machine, along with laundry detergent, to boost your wash.

FEATURES:

- Neutral pH detergent
- Oxygen Safety bleach

BENEFITS:

- Will wash without the harsh effects of alkaline detergents.
- Whites and coloureds are brightened.

DIRECTIONS

NAPPY WASH is designed to work in cold and hot water. However, for best results on stubborn stains use water with temperature in excess of 40deg C. Ideally 40 - 60 deg. C. Soaking: Add 40-60 grams to 8 litres of water.

HOUSEHOLD: For general laundry add a third of a cup to half a cup of NAPPY WASH per load.

COMMERCIAL: Use 20g of NAPPY WASH per kilo of laundry to be washed.

Soak soiled garments for a one to two hours, longer if possible. Remove and wash in machine. Repeat process if staining persists.

Caution should be used on delicate fabrics.

ACTIVE INGREDIENTS:

- >900g/kg Alkaline Salts.

QUANTITY AVAILABLE and PRODUCT CODE:

- | | | | |
|--------|----------|--------|----------|
| • 5 kg | 5861075 | • 20kg | 5861074 |
| • 25kg | 58610745 | • 2kg | 58610752 |

CHEMICAL HAZARD STATUS:

- Mildly Alkaline – Product is below pH 9.5. Unlikely to cause irritation or burning.

* Caution: Care should always be taken when applying a product to a cleaning situation for the first time.

A TIP FROM THE CHEMIST

NAPPY WASH will activate in cold water. This feature is useful when you are unsure of the stain and want try to remove it without the risk of locking it in with a hot water treatment. When you are confident that you can release the stain, revert back to hot water, as it will work best.
